PROFESSIONAL SUMMARY

Full-stack engineer who ships production software across mobile and web. Designed and released a commercial Flutter POS live on Android and iOS and delivered enterprise banking modules as Angular micro-frontends over an ASP.NET Core API. Strongest where the problem is real concurrency, unreliable networks, device hardware and live legacy systems. Currently completing BEng (Hons) Software Engineering, University of Westminster (IIT Sri Lanka).

PROFESSIONAL EXPERIENCE

Software Engineer — Mobile & Web (TagTeam Engineering)

2025 – Present

EvoSolutions product suite — EvoDine (restaurant), Evolnn (hospitality), EvoStock (inventory).

- Designed and built EvoDine v1.0 (Apr 2026) a cross platform Flutter POS for Android and iOS covering orders, kitchen/bar board, payments and reporting.
- Built real-time sync on SignalR (auto-reconnect, graceful offline fallback) and end-to-end Bluetooth thermal receipt printing.
- Owned the client architecture (layered, 20 services over a .NET API), security hardening (AES, in memory credentials), release engineering (R8, keystore signing), and the React + TypeScript web platform with Vitest/Playwright tests.

Software Engineer Intern – Scienter Technologies (Pvt) Ltd

Jun 2025 – Jul 2026

eFinancials a decentralised core banking platform spanning 17 modules across lending, risk and compliance.

- Owned the Business Service Partner domain end to end requirements to UAT including the BSP 360 relationship view and advanced search.
- Delivered Credit Risk Rating, customer profiling and AML sanction document processing compliance critical paths.
- Built as Angular 19 micro-frontends (Native Federation) over a layered ASP.NET Core API on SQL Server, with peer review and Karma/Jasmine tests.

Full-Stack Developer – Freelance

2023 – Present

- Sole engineer delivering production web apps for clients (**Udara Store, Galle Lanka Travels**) from data model to deployment including conflict aware booking and performance tuning with React, Node.js and Firebase.
